

COLL 4-2

16 June 1960

MEMORANDUM FOR: Chief, Foreign Intelligence Staff, DD/P

SUBJECT: IPC Targets for PNIO Category I.f. Objectives

1. The attached contribution has been forwarded to the DD/I Representative on the IPC for the Committee's consideration of targets for inclusion in the IPC List on the Sino-Soviet Bloc. These targets are related to Category I.f. in the Priority National Intelligence Objectives. Although this information has not yet been formally accepted and incorporated in the IPC List, the attached advance copy is being forwarded for your information and possible use in planning by the various DD/P area divisions. A copy was informally requested by EE Division for this purpose.

2. The background information included with this contribution is necessary for an understanding of the rationale of target selection and arrangement of specific collection objectives. Both AFCIN JT (Target Materials Division) and the Mapping and Geodesy Division of ACSI have contributed to and concur in the substance of the background and in the arrangement of collection priorities.

3. Collection guides for individual countries in the Sino-Soviet Bloc covering the mapping and geodesy requirements have been or are in the process of being produced by ORR. These are:

- RDC-2196 (USSR)
- RDC-2254 (Czechoslovakia)
- RDC-2070 (East Germany)
- RDC-2187 (Poland)
- RDC-59-0302 (Bulgaria)
- RDC-59-0303 (Rumania)
- RDC-59-0304 (Hungary)
- RDC-60-0201 (China)
- RDC-60-0916 (Albania)

These guides contain background and target information in addition to that included in the attached IPC contribution. All of the guides have been coordinated with AFCIN, ACSI, and ONI. Each guide also contains a map showing a breakdown of area priorities and military targets within the individual countries.

**SUBJECT: IPC Targets for PNIO Category I.f. Objectives**

4. Separate lists of both map production and consumer organizations in the Bloc are being prepared for the DD/P to supplement the target information in the attachment. Many of these supplementary targets may be more "feasible" in terms of collection possibilities; however, they were not incorporated into the IPC List on the grounds that in most cases these installations would probably have only selected map coverage of limited areas.
